

FILTER SYSTEMS

Durability, Efficiency, and Reliability

Leatherwood Plastics' Filter Systems embody all of these qualities. Efficient not only in performance, but also in design, these small units are ideal for those with space limitations as well as for those with space to spare. All solution-contacted parts within our filter systems are constructed of a durable thermoplastic for corrosion resistance. Cartridge changes and unit maintenance is fast and easy with the simple design of these Filter Systems.

Available in a wide range of models to fit your filtration requirements, every unit is constructed with these features:

- Compact, efficient design
- All CPVC chambers
- Can be used with all standard filter cartridges, including carbon
- Filter cartridges are easily changed
- Pumps are all-polypropylene construction
- Simplicity of pump parts replacement
- Portable for flexibility of application
- Pumps isolated from solution on elevated, sloped mounting bases
- All systems supplied with braided vinyl hose
- TEFC motors optional

SOLVENT FILTRATION SYSTEMS AVAILABLE

Solvent filter systems feature air-operated diaphragm pumps and stainless steel filter chambers. Many sizes and configurations are possible, based on filtration requirements.
