

PLATING PROCESS SYSTEMS

Leatherwood Plastics is dedicated to the challenge of designing, developing and producing equipment that will make quality plating easier and more efficient. We produce state-of-the-art modular plating and hoist systems for all types of plating processes...from Electroless Copper and Black Oxide to Electroplate Copper and Tin / Lead, including "Black Hole" and Permanganate.

An off-the-shelf design may not fit your requirements, so let us design your system to meet your specific needs – whatever they may be. You will be talking to the right people: people who care and respond to your needs to give you the very best at fair and reasonable prices, and competitive delivery schedules.

Our customers represent a mix of some of the largest companies in the world, along with progressive, highly motivated and competitive smaller firms who require the finest production equipment available.

TURNKEY PLATING SYSTEMS INCLUDE:

- Facilities planning or coordination with existing plant conditions, including water, waste treatment, precious metal recovery, and ventilation
- Complete system design, manufacturing and installation
- Start-up and operator training
- Field service after the sale

All systems feature attractive, functional design, convenient access for plumbing adjustment and maintenance, and are built with operator safety and efficiency in mind.

SYSTEMS CAN BE FURNISHED WITH ANY OF THE FOLLOWING:

- Manual or automatic hoist systems
- Panel mounted or remote controls
- Convenient access for plumbing adjustments
- Automatic fill / empty operation
- o Heaters
- o Timers
- o Filter Systems
- o Pumps
- o Rectifiers
- o Agitation
- o Anodes
- o Plating Racks
- o Blowers
- o Scrubbers
- o Chillers
- o Level Controls
- o Plating Barrels
- o Ion Exchange Systems
- o Ultrasonic Cleaners
